PROFILE

Computer Science undergraduate with hands-on experience in developing user-centered web applications, with a strong focus on usability and intuitive design. Skilled in frontend and backend development using technologies including React, JavaScript, Python, Java, and SQL, with practical experience integrating APIs and building real-time systems.

Demonstrated ability to work collaboratively in team environments using Git, contributing to both system development and testing processes. Interested in frontend development, quality assurance, and full-stack roles, with a growing focus on improving user experience, system reliability, and efficient project delivery.

EDUCATION

Bsc (Hons) Computer Science

2025 – Present

IIT affiliated with University of Westminster

G.C.E. AL

Sirimavo Bandaranaike Vidyalyaya, Colombo 07

Combined Mathematics - C

Chemistry - C

Physics - C

English - A

G.C.E. OL

Sirimavo Bandaranaike Vidyalyaya, Colombo 07

Achieved 9A passes including Mathematics, ICT and English

PROJECTS

AI-Enhanced Pharmacy Management System – Software Development Group Project

2025 – Present

Developed a comprehensive pharmacy platform featuring AI-assisted stock management, a patient-centric WhatsApp bot, and automated refill/dosage reminders.

- Developed a patient-centric WhatsApp bot using Python, FastAPI, and Twilio to automate prescription handling and communication
- Implemented a disease alert feature to notify users of high-risk or spreading diseases
- Integrated backend services with MySQL and SQLAlchemy for efficient data management
- Collaborated in a team using Git, contributing to backend logic, debugging, and testing processes

Technologies: Python, FastAPI, MySQL, SQLAlchemy, Pytest, Twilio API, Next.js, React, Typescript, Tailwind CSS

Property Listing Web Application – React Front-End Project

2025 – 2026

- Implemented a responsive React-based front-end for a property sales and rental platform.
- Designed reusable components to display dynamic property data.
- Focused on structured layout and user-friendly navigation to improve usability.

Technologies: React, JavaScript

EarthCare – UX/UI High-Fidelity Prototype (Figma)

2025

- Designed and prototyped a sustainability-focused application aligned with UN Sustainable Development Goals.
- Incorporated recycling guidance, volunteering features and gamified rewards to improve engagement and usability.

Technologies: Figma

SKILLS

Technical Skills

- **Languages:** Java, Python, JavaScript
- **Frontend:** React, HTML, CSS, Tailwind CSS
- **Backend:** FastAPI
- **Databases:** MySQL
- **Testing:** Pytest
- **Tools:** Git, GitHub, Figma, Axure, VS Code, IntelliJ, ClickUp

Soft Skills

- Analytical thinking
- Collaborative teamwork
- Usability-focused mindset
- Effective Communication

CERTIFICATES AND WORKSHOPS

Global Leadership & Outreach Workshop

Completed a leadership and sustainability-focused workshop at Sysco LABS in 2026, contributing to innovative solutions and deepening knowledge of SDG initiatives and collaborative problem-solving.

VOLUNTEERING

Cipher 2.0 – Delegate Handling Team

2026 (Upcoming)

Selected through an interview process to assist with delegate coordination and event management.
