👤 Oneli Herath 🎧 Medium: Oneli Herath 📁 Portfolio: Oneli Herath

PROFILE

Computer Science undergraduate focused on quality assurance and UI/UX, with hands-on experience in building and testing user-centered web applications. I combine a strong attention to detail with a usability-driven mindset to ensure systems are both functional and intuitive. I don't just build features, I ensure they work seamlessly, perform reliably and deliver meaningful user experiences.

EDUCATION

Bsc (Hons) Computer Science

IIT affiliated with University of Westminster

G.C.E. A/L

Sirimavo Bandaranaike Vidyalyaya, Colombo 07

Combined Mathematics - C

Chemistry - C

Physics - C

English - A

G.C.E. O/L

Sirimavo Bandaranaike Vidyalyaya, Colombo 07

Achieved 9A passes including Mathematics, ICT and English

PROJECTS

AI-Enhanced Pharmacy Management System – Software Development Group Project

2025 – Present

Developed a comprehensive pharmacy platform featuring AI-assisted stock management, a patient-centric WhatsApp bot, and automated refill/dosage reminders.

- Developed a WhatsApp bot using Python, FastAPI, and Twilio to streamline prescription handling and notifications.
- Implemented a disease alert feature to notify users of potential health risks.
- Integrated backend services with MySQL and SQLAlchemy for efficient data management.
- Collaborated within a team using Git, contributing to backend development, debugging, and testing processes.
- Participated in **UI/UX design**, contributing to user flow structuring and improving usability of the system.

Technologies: Python, FastAPI, MySQL, SQLAlchemy, Pytest, Twilio API, React, Next.js, TypeScript, Tailwind CSS, Figma

Property Listing Web Application – React Front-End Project

2025 – 2026

- Built a responsive React-based interface for a property sales and rental platform.
- Designed reusable components to display dynamic property data.
- Focused on clean layout structure and user-friendly navigation to improve usability.

Technologies: React, JavaScript

EarthCare – UX/UI High-Fidelity Prototype (Figma)

2025

- Designed and prototyped a sustainability-focused mobile application aligned with UN Sustainable Development Goals.

- Integrated features such as recycling guidance, volunteering opportunities and gamification to enhance user engagement.

Technologies: Figma

SKILLS

Technical Skills

- **Languages:** Java, Python, JavaScript
- **Frontend:** React, HTML, CSS, Tailwind CSS
- **Backend:** FastAPI
- **Databases:** MySQL
- **Testing:** Pytest
- **Tools:** Git, GitHub, Figma, Axure, VS Code, IntelliJ, ClickUp

Soft Skills

- Analytical thinking
- Collaborative teamwork
- Usability-focused mindset
- Effective Communication

LANGUAGES

- English
- Sinhala
- Mandarin

CERTIFICATES AND WORKSHOPS

Global Leadership & Outreach Workshop – Sysco LABS (2026)

- Participated in a leadership and sustainability-focused program.
- Contributed to innovative solutions aligned with Sustainable Development Goals (SDGs).
- Strengthened collaboration and problem-solving skills in team environments.

VOLUNTEERING

Cipher 2.0 – Delegate Handling Team 2026 (Upcoming)

- Selected through an interview process to assist in delegate coordination and event management.
- Responsible for ensuring smooth communication and organization during the event.
